

Who makes Swiss solar modules?

SWISS SOLAR AG manufactures high-quality solar modules and is leading and globally active technology company. SWISS solar modules are engineered in Switzerland and meet the highest quality standards. As an internationally recognized premium brand.

Who is solar solutions?

At the forefront of the renewable energy sector in Malta, Solar Solutions was set up in 2005 by individuals with a passion for sustainability. Our unwavering commitment has enabled numerous households and businesses to adopt solar power, creating a positive environmental impact through harnessing the sun's energy.

What is a Swiss PV auction?

The Swiss auctions are considerably different from other European PV auctions. First, bidders compete for an investment subsidy (covering up to 60% of investment costs), unlike a CfD contract that most EU countries award (see Figure 1b). Second, only projects larger than 150 kW can participate.

How many solar PV projects did SFOE offer?

The first solar PV auction was undersubscribed, and out of the 50 MW of auctioned solar PV capacity, SFOE received offers for 43 MW and awarded only 35 MW worth of projects. The second round was oversubscribed with 74 MW worth of bids, of which 47 MW received support.
