

Who is Dutch energy solutions?

Dutch Energy Solutions was founded in 2009 by association FME and Association IRO on the behalf of the Ministry of Economic Affairs and Climate Policy of the Netherlands. Oman's capital, Muscat, has proposed a unique approach to urban development, diverging from the high-rise, expansive style of cities like [...]

What type of energy is primarily used in Syria?

In Syria, most energy is based on oil and gas. Some energy infrastructure was damaged by the Syrian civil war. In the 2000s, Syria's electric power system struggled to meet the growing demands presented by an increasingly energy-hungry society.

Why is energy demand increasing in Syria?

Energy demand in Syria has been increasing at a rate of roughly 7.5% per year due to the expansion of the industrial and service sectors, the spread of energy-intensive home appliances, and state policies that encouraged wasteful energy practices, such as high subsidies and low tariffs.

How many barrels of oil does Syria produce daily?

Syria produced 400,000 barrels per day (64,000 m<sup>3</sup>/d) in 2009 and exported about 150,000 barrels per day (24,000 m<sup>3</sup>/d). The country's oil reserves were estimated to be 2.5bn barrels in 2010. The Syrian Petroleum Company (SPC) is a state-owned oil company established in 1974.

In a recent interview, Syrian Minister of Electricity Ghassan al-Zamel detailed the extensive damage that the electricity sector has endured over the thirteen-year war, estimating direct losses at \$40 billion and indirect losses exceeding \$80 billion. The destruction of electrical infrastructure and transmission lines has incapacitated more than 50 percent of ...

"Innovators in the energy industry acting in a cluster" The Netherlands has a longstanding history of energy production. Historically a major gas field was exploited. Exploration and production of challenging offshore oil and gas locations enabled development of technology now widely used for offshore wind farms. Besides solar power, widespread use of heat pumps and biomass,
