

Why is Syria's energy sector in turmoil?

Syria's energy sector is in turmoil because of the ongoing civil conflict that began in the spring of 2011, with oil and natural gas production declining dramatically since then. Syria's energy sector has encountered a number of challenges as a result of conflict and subsequent sanctions imposed by the United States and the European Union.

What happened to Syria's oil & natural gas industry?

Syria, previously the eastern Mediterranean's leading oil and natural gas producer, has seen its production fall to a fraction of pre-conflict levels. Syria is no longer able to export oil, and as a result, government revenues from the energy sector have fallen significantly.

What type of energy is primarily used in Syria?

In Syria, most energy is based on oil and gas. Some energy infrastructure was damaged by the Syrian civil war. In the 2000s, Syria's electric power system struggled to meet the growing demands presented by an increasingly energy-hungry society.

Does Syria have electricity?

Syria also had separate entities for the generation and distribution of electricity. Syria's oil sector has been in a state of disarray since 2011. Production and exports of crude oil have fallen to nearly zero, and the country is facing supply shortages of refined products.

What happened to Syria's electricity generating capacity in 2012?

Syria's electricity generating capacity was 8.9 gigawatts in 2012, although damage to electricity generating facilities, high voltage power lines, and other infrastructure has likely reduced the country's effective capacity. Electricity distribution losses, already 17% of total generation in 2012, have likely climbed even further.

Who regulates oil & natural gas in Syria?

In 1964, Syria passed legislation that limited licenses for exploration and investment to the Syrian government. The Ministry of Petroleum and Mineral Resources oversees the Syrian oil and natural gas sectors, and is in charge of setting policy priorities and coordinating the efforts of the state-led companies that operate in the sector.

8 · U.S. diplomats held a promising meeting in Damascus with Syria's new leader, Ahmed al-Sharaa, discussing political transition and counter-terrorism. This resulted in the removal of a bounty on al-Sharaa. The meeting signifies a step towards stabilizing Syria's political landscape and ensuring security both internally and externally.
