

Terang Bess Western Sahara

What is the Terang Bess project?

The Terang BESS project will significantly contribute to economic development in the southwest region of Victoria. FRV Australia anticipates the project will create up to 150 jobs during the construction phase and will employ three to four permanent operational staff. FRV Australia will also award site maintenance contracts to local businesses.

Where is Terang Bess located?

The Terang BESS is located approximately 19 kilometres west of Camperdown, near the town of Terang in the shire of Corangamite. The site covers approximately 3.0 hectares of agricultural land. The facility will comprise energy storage and conversion infrastructure.

What is FRV Australia's Terang Bess project?

This marks a significant milestone in FRV Australia's commitment to advancing various renewable energy infrastructure technologies. The Terang BESS, a 100MW/200MWh large-scale battery project located in the state of Victoria, is financed under FRV Australia's recent AUD\$1.2bn portfolio refinancing facility.

What is the Terang Bess & how does it work?

The Terang BESS is now under construction. Once operational, it will improve the reliability of the electricity network by storing power when there is a lot of energy available (for example during the day) and releasing this stored energy when demand is higher.

How will Terang Bess help FRV?

Adjacent residents and stakeholders will be kept up to date by FRV and its contractors on the plans and expected milestones. Terang BESS will assist Victoria's electrical network to compensate for times of high energy demand and oversupply.

When will Terang Bess be built?

obtained in May 2021. The planned construction start date is in 2024 and will extend for a proximately 20 months. Once operational, the Terang BESS will improve the reliability of the electricity network by storing power when there is a lot of energy available (for example during the day) and releasing this stored energy
