

Thailand etf battery storage

Does Thailand need a battery energy storage system?

Thailand may lack the Battery Energy Storage Systems (BESS) necessary to navigate supply and demand challenges. The 2024 PDP draft included 10,000 MW of BESS, but this may see the country struggle to fulfil carbon neutrality and Net Zero commitments over the coming decades.

What is fund flow data for Thailand ETFs?

The table below includes fund flow data for all U.S. listed Thailand ETFs. Total fund flow is the capital inflow into an minus the capital outflow from the for a particular time period. Fund Flows in millions of U.S. Dollars.

Why is battery storage a problem in Thailand?

This is partly due to a lack of clarity on how battery storage fits into existing electricity infrastructure. In 2022, the Thai government approved 24 BESS projects, all of which were located alongside solar operations. Their total combined storage capacity was 994 MW.

What is a battery energy storage system?

Battery energy storage systems (BESS) are essential for buildings and renewable power generation facilities to ensure uninterrupted electricity supply. Renewable sources like solar and wind power are intermittent, and influenced by weather patterns. BESS mitigates this issue by storing electricity for future use.

Where is the Batt ETF traded?

The Batt ETF is traded on LSE. The fund and share class size is \$158.27 million. It provides exposure to stocks of firms providing for electrochemical energy storage technologies as well as miners producing metals for battery manufacturing.

Could a sodium-ion battery be a new business opportunity in Thailand?

The Federation of Thai Industries' Renewable Energy Industry Club sees potential in sodium-ion battery (SIB) production as an alternative to lithium-ion batteries. SIBs, made from rock salt, could offer a new business opportunity given Thailand's abundant rock salt reserves.

The ETF's TER (total expense ratio) amounts to 0.50% p.a.. The Xtrackers MSCI Thailand UCITS ETF 1C is the only ETF that tracks the MSCI Thailand index. The ETF replicates the performance of the underlying index by full replication (buying all the index constituents). The dividends in the ETF are accumulated and reinvested in the ETF.

Beleggingsdoelstelling: L& G Battery Value-Chain UCITS ETF (EUR) | BATT: The investment objective of the Fund is to provide exposure to companies that produce metals that are primarily used for manufacturing batteries and companies that develop electro-chemical energy storage technology (i.e. battery technology) and/or that produce batteries.
