

Timor-Leste nichent energy inc

How can nichent energy help you?

Nichent Energy can help you or your company to choose the best turn-key energy-efficient lighting solutions. Utilizing our auditing software, Nichent Energy can quickly and accurately illustrate the energy and maintenance savings you can expect by choosing to invest in LED technologies.

Are nichent LED lights Energy Star certified?

Our Technology. All Nichent Energy's Lighting Products are either DLC or Energy Star Certified. Sensored LED lights are energy-efficient lighting solutions that can automatically turn on or off based on occupancy or ambient light levels, providing enhanced safety, security, and convenience.

Does Timor-Leste have electricity?

Timor-Leste has rapidly expanded electricity access to more than 83 per cent of the population but the country has yet to achieve energy security.¹ Consumer costs, even with government subsidy, remain high and outages are common. In addition, most of Timor-Leste's electricity is generated through costly and polluting diesel generators.

What does a solar technician do in Timor-Leste?

Technicians in Timor-Leste have experience in small-scale, off-grid solar energy systems. Commercial or industrial scale installations are more complex and appropriate technical capacity is scarce.

Is Timor-Leste a good country for solar energy?

Timor-Leste has a high-quality solar resource. The global horizontal irradiance in Dili is higher than on the east coast of Australia, where the solar market is mature and installation costs are higher. The cost of electricity in Timor-Leste for commercial and industrial consumers is high compared to ASEAN countries.

Is there a market for roof-top solar energy systems in Timor-Leste?

Australia's Market Development Facility (MDF) and ITP Renewables conducted an assessment of the potential market for roof-top solar energy systems in Timor-Leste.

We did this in order to understand the dynamics of how the energy transition is affecting one of our closest neighbours. The Timor Sea separates Dili and Darwin. Image: Pell Center . About Timor-Leste. Timor-Leste (also known ...

Timor-Leste Primary Energy Consumption data was reported at 2.134 TWh in Dec 2021. This records an increase from the previous number of 2.067 TWh for Dec 2020. Timor-Leste Primary Energy Consumption data is updated yearly, averaging 1.263 TWh (Median) from Dec 2003 to 2021, with 19 observations. The data reached an all-time high of 2.181 TWh in 2014 and a ...
