

Timor-Leste sabiana energy smart

What are sabiana energy smart units?

The Sabiana Energy Smart units are high efficiency ventilation units with heat recovery and are designed for residential applications. The units replace the stuffy air of indoor environments with filtered air coming from the outside thanks to a special F7 class microfilter.

Is a solar-powered Grid a good idea in Timor-Leste?

With the new UN reforms, the United Nations in Timor-Leste, under the leadership of the Resident Coordinator has now started lighting the way with its solar-powered grid which has begun to give maximum dividends. A powerful 300 kWp photovoltaic system is producing 400,000 kWh of clean electricity annually, filling critical gaps in energy supply.

Does Timor-Leste have electricity?

Timor-Leste has rapidly expanded electricity access to more than 83 per cent of the population but the country has yet to achieve energy security.¹ Consumer costs, even with government subsidy, remain high and outages are common. In addition, most of Timor-Leste's electricity is generated through costly and polluting diesel generators.

How will the ADB help Electricidade de Timor-Leste?

In Southeast Asia, Electricidade de Timor-Leste has secured funding from the Asian Development Bank (ADB) to modernise its grid network with smart meters and smart grid technologies. The utility will use a \$35 million loan from the ADB to ensure its grid network is resilient enough to power consumers in 12 municipalities.

Can a solar energy system help Timor-Leste achieve the 2030 Agenda?

"In Timor-Leste, our road to the 2030 Agenda for Sustainable Development starts at home. Our solar energy system can be a model for other UN Country Offices to show how we can jointly, sustainably and effectively tackle greenhouse emissions while reducing operational costs, and scale up support across the United Nations System.

What is Timor Leste Strategic Development Plan 2011 - 2030?

However, the government has established TIMOR-LESTE STRATEGIC DEVELOPMENT PLAN 2011-2030 to increase the percentage of renewable energy up to 50% in 2020 and a half, planned to be fully implemented by 2030. However, it is still challenging to achieve the target due to various impacts such as insufficient budget and uncertain political issues.
