Why did Yokogawa acquire baxenergy?

Tokyo, Japan - June 5, 2024 Yokogawa Electric Corporation (TOKYO: 6841) announces that it has acquired BaxEnergy, a leading provider of renewable energy management solutions (REMS). This acquisition will provide Yokogawa with a proven range of solutions that have already been adopted by major power companies throughout Europe.

What type of electricity does Togo use?

Renewable electricity here is the sum of hydropower, wind, solar, geothermal, modern biomass and wave and tidal power. Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important source in lower-income settings. Togo: How much of the country's electricity comes from nuclear power?

Why did Yokogawa visit baxenergy's HQ in Sicily?

In the months that followed, representatives from Yokogawa visited BaxEnergy's headquarters in Sicily, eager to see firsthand how the company managed its customers' assets. Located in the heart of Acireale (CT), BaxEnergy's HQ provided the perfect backdrop for a deeper exploration of potential synergies between the two companies.

Does baxenergy comply with NERC regulations?

Our strict adherence to the NIS2 directive demonstrates our dedication to not just meeting, but surpassing European standards for network and information system security. BaxEnergy is known for its reliability, and our compliance with NERC regulations is a perfect example of this commitment.
