

Tonga talus renewables

What is talus renewables?

To realize humanity's sustainable future by improving access to food and fuels technology for all. Talus Renewables, an energy technology company, has pioneered the first commercial, modular, zero-carbon green ammonia system that makes the production and distribution of a critical raw material cheaper, cleaner, and more reliable.

What is talus ammonia used for?

Talus locally produces lower-cost, carbon-free ammonia at or near the point of use, creating value for agriculture, mining, and maritime shipping, with applications in renewable energy storage and power generation. Why green ammonia? Ammonia is a critical raw material used in fertilizers and other industrial applications.

How can talus reduce supply chain length?

Talus's systems' ability to generate lower-cost, carbon-free ammonia at or near the point of use reduces or eliminates supply chain length for agriculture, mining, and industrials, with additional applications in maritime shipping, renewable energy storage, and power generation.

Is talus a green ammonia?

Ammonia is a critical raw material used in fertilizers and other industrial applications. Grey ammonia contributes 2% of global carbon emissions and depends on an unreliable and costly supply chain. Talus supports a cheaper, cleaner alternative: Green Ammonia. Why Talus?

How does talus work?

Talus locally produces lower-cost, carbon-free ammonia at or near the point of use, creating value for multiple industries. The talusOne and talusTen operate on intermittent renewable power and are fully containerized and modular, enabling rapid deployments and scaling.

What makes Xora innovation different from talus renewables?

Phil Inagaki, Managing Director of Xora Innovation said: "Xora Innovation specializes in supporting ventures tackling some of the world's greatest challenges through the commercialization of disruptive technologies and Talus Renewables embodies this investment thesis. One of the distinguishing features of Talus is their speed of execution.
