The Mobility Pavilion is one of the three thematic pavilions developed at the Expo 2020. The Mobility Pavilion occupies a dedicated plaza at the south entrance to the site and has a lively, dynamic landscape conceived as a fairground with undulating tracks and demonstration areas for the latest technological innovations related to mobility. The surrounding

As the power triangle relationships of this simple example demonstrates, at a power factor of 0.46 or 46%, the coil requires 156.2 VA of apparent power to produce only 72.60 watts of real, usable work. In other words at 46% power factor, the coil takes about 70% more current to do the same work. This is significant amount of wasted current that ...
