RENEWABLE ENERGY POWER GENERATION POTENTIAL IN TRINIDAD AND TOBAGO 10 The Government of Trinidad and Tobago has a target for 30% of electricity generation to be from renewable energy by 2030 As the first renewable energy projects in Trinidad and Tobago only started in 2021, there is a major first-mover opportunity for investors. Promising outlook:

renewable energy is essential as it provides a sustainable way to fulfil energy requirements while reducing reliance on fossil fuels for power generation. In the National Budget presentation, The Minister indicated that the Government aims to achieve 30% of energy needs via renewable energy by 2030 and also highlighted

Trinidad & Tobago urgently needs to bring significant volumes of renewable energy into its electricity grid to help secure the future of its natural gas-based industries. This might sound counter intuitive, but it reflects the reality of the nation's gas sector, which dominates its economy, and the medium-term outlook for gas production in ...

TTS 171-3:2011, Trinidad and Tobago Electrical Wiring Code - Part 3: Renewable Energy Systems and Interconnection Requirements \$ 152.00

The project owners are bp Alternative Energy Trinidad and Tobago (bpAETT) and Shell Renewables Caribbean (Shell), the respective units of oil majors BP Plc (LON:BP) and Shell Plc (LON:SHEL). Lightsource bp took credit for negotiations and development of the project.

Trinidad and Tobago's electricity generation is completely fired by fuel, but only 8% of its natural gas output is channelled to electricity generation. Directing the gas to its power stations deprives the country of potential revenues that could be gained from selling liquefied natural gas (LNG) as feedstock, especially given that only one of
