

Why is the Solar Energy Association of Ukraine important?

As the last 2 years have shown, Ukrainians still have to fight for their right to clean energy, so the Solar Energy Association of Ukraine has a public duty to be a place of public opinion and unification of responsible business environment for the inevitability of our state's course to clean and safe renewable energy.

Could Ukraine become the largest producer of solar energy in Europe?

Ukraine has vast territories suitable for the installation of solar power plants and favourable climatic conditions. The country could become one of the largest producers of solar energy in Europe. The European Commission has conducted a study of the needs for grid development and renewable energy in Central and South-Eastern Europe.

Why should you invest in solar energy in Ukraine?

Ukraine actively embraces digital technologies in the field of solar energy, ensuring effective and automated system operations. Ukrainians are not afraid of working beyond the norm and thus operate at a rapid pace.

Who are the members of Solar Energy Association?

The association comprises more than 45 members, including Ukrainian and international companies involved in various aspects of solar energy, such as distribution, manufacturing, installation, legal support, and large-scale industrial solar power plants.

Creating an ecosystem of solutions Experience cutting-edge mining and complete blasting solutions that cater to diverse sectors, encompassing defence, construction, quarries, seismic exploration, tunnelling, hydro projects and more.

The second largest solar power plant in Ukraine was officially put into operation last month. The power plant is a joint-venture by ICU and VR Capital Group and is situated in the Kamianets-Podilskyi district of the Khmelnytsky region. The plant has a capacity of 64MW.
