

Upowa solar panels Madagascar

What is upowa inline solar?

UPOWA Inline Solar delivers a 410W power output per solar module, making it one of the most powerful roof-integrated solar systems on the market. With design flexibility and maximised power built in, housing developers can achieve carbon reduction targets with fewer solar panels. This saves roof space, material costs and installation time.

What services does upowa offer?

A call center is also available to help upOwa clients with any trouble they might face. PAYG stands for Pay-As-You-Go, which means our clients can pay for a solar home system in regular, flexible installments all the while using their product. Monthly payments are equivalent to the monthly cost of kerosene lamps.

Why should housing developers choose upowa inline solar?

With design flexibility and maximised power built in, housing developers can achieve carbon reduction targets with fewer solar panels. This saves roof space, material costs and installation time. UPOWA Inline Solar directly replaces roofing tiles to provide a sleek, low-profile and weather-tight finish.

What is a PAYG solar home system?

PAYG stands for Pay-As-You-Go, which means our clients can pay for a solar home system in regular, flexible installments all the while using their product. Monthly payments are equivalent to the monthly cost of kerosene lamps. Our solar home systems have a minimum warranty of 18 months, and their light will shine many years after this period ends.

Who is upowa?

UPOWA is part of the Brickability Group PLC, a market-leading supplier of building materials and contracting services to the construction industry. A trusted partner for all your sustainability needs. Looking to future-proof your project for net-zero? UPOWA has got you covered.

Why should you use upowa products?

Access to information is improved with the use of radios. Customers' direct natural environment will benefit from the use of clean energy. upOwa products substantially reduce CO₂ emissions, as they replace previously used fossil fuels, burnt in lamps or diesel generators.
