

Verdo energy system Pitcairn Islands

Can solar energy replace fossil fuels on Pitcairn Island?

Pitcairn's authorities have launched a renewable energy project designed to replace fossil fuels with solar energy. The goal is to replace 95% of the current diesel consumption on Pitcairn Island (75,000 liters per year) with a combination of energy saving and solar electricity through the installation of a hybrid photovoltaic solar energy system.

What is Verdo Energy's decentralized waste to energy concept?

Verdo Energy's decentralized Waste to Energy concept is focused on handling the waste where it is generated and converting the energy from waste into thermal or electrical energy used for private industries or local municipalities with a need of energy. We have four standard sizes for the waste to energy boiler plant, 4MWt, 6.7MWt, 10MWt and 15MWt.

What size boiler does Verdo energy offer?

We have four standard sizes for the waste to energy boiler plant, 4MWt, 6.7MWt, 10MWt and 15MWt. Verdo Energy has many years of experience within biomass conversion, and the company converted its own CHP plant in 2009. At the same time, we supply hot-water boilers in the 1-20MW capacity range for production of heat and steam.

Are the Pitcairn Islands Green?

Pitcairn Islands, a group of five islands with a total area of 47 km² and which constitute one of the most remote archipelagos in the world, turn to safer, greener energies that best meet the needs of the population. Pitcairn's authorities have launched a renewable energy project designed to replace fossil fuels with solar energy.

Join other wise consumers who have selected Verde Energy as their supplier. We are proud to offer 100% renewable electricity and carbon-neutral natural gas plans. Make real changes in your everyday cost of living and your impact on the environment, starting with your energy bill. Renewable energy is a smart and sustainable decision that makes ...

Det var lidt af et særsyn, da Aabybro Fjernvarme skulle have leveret deres nye energianlæg fra Verdo. De over 50 ton tunge hovedkomponenter til anlægget blev nemlig fragtet på to cirka 20 meter lange og 6,6 meter høje transporter hele vejen fra Verdo Energy Systems i Herning henover Limfjordsbroen til slutdestinationen hos Aabybro Fjernvarme.

Verdo specialiserer sig i opbygning af energianlæg - kedelanlæg, solfangeranlæg, varmepumpeanlæg, elkedler og biomasseanlæg samt tilbyder kedelservice og biobrændselse til ...
