This chart shows the 14 day weather trend for Papua New Guinea with daily weather symbols, minimum and maximum temperatures, precipitation amount and probability. The deviance is coloured within the temperature graph. The stronger the ups and downs, the more uncertain the forecast will be. The thick line represents the most probable trend.

The climate of New Guinea is quite diverse, because most of the island is mountains with towns and villages at 2000-2500-meter height. And the air here is pretty cool. The temperature difference with the coast can be 15 degrees. If you are going to large mountains, for example, to the peak of Kaiser Wilhelm, then there, on top, can be about 0 C at any time of the year.

B& R Enclosures" range of plastic enclosures and adaptable boxes consists of various different enclosure groups, including our Polynova PJ, PS, PM, PC, PN & PD. With protection ratings of IP55, IP65 and IP66, the Polynova range is a great plastic enclosure for any application.
