# Wholesale solar panels in Tokelau

Can a solar array power Tokelau?

Solar Array's seen on the three tiny islands of Tokelau to completely produce solar power energy. The renewable energy system comprising of solar panels, storage batteries and generators running on biofuel derived from coconut will generate enough electricity to meet 150% of the islands' power demand.

Could Tokelau be the world's first renewable nation?

Solar power plants and coconut biofuel-powered generators switched on in Tokelau has made the islands the world's first truly renewable nation.' Imagine a place where the only energy to be found is clean,reliable solar power. Solar Array's seen on the three tiny islands of Tokelau to completely produce solar power energy.

Where does Tokelau get its electricity from?

Except for that part of the electricity supply provided by Solar Photovoltaic (PV) to TeleTok facilities on all three atolls and the University of the South Pacific (USP) facility on Atafu,essentially all energy in Tokelau currently is from imported petroleum.

What is the Tokelau PV project?

The Government of Tokelau sees the PV Project as the first step and therefore trial towards the long-term goal of energy independence based on renewable energy. The project is implemented by the Government of Tokelau and funded jointly by Government of New Zealand,Government of France,UNESCO Apia and UNDP Samoa.

What is Tokelau's energy policy?

The primary focus of the policy is the desire of Tokelau to become self-reliant in energythrough a combination of renewable energy and energy efficiency measures.
