

Building upon the process developed to draft the 2017 NEP, the updated Policy draws upon inputs from Cayman Islands private and public sector stakeholders, and local and foreign experts advising on the current market context of energy sector reform topics, including energy efficiency, renewable energy, and electric vehicles.

Cayman's goal of obtaining 70% of its power from renewable resources by 2037 has raised discussion for alternative ways of doing this. While solar power remains a trusted option for renewable energy, with rising fuel prices and increasing air conditioning costs, interest in geothermal energy cooling systems is also on the rise.
