World Resources Energy (WER) 2013 es el nuevo título de esta publicación y de hecho, es la 23ª edición de la Encuesta. La encuesta es reconocida mundialmente como la principal fuente de información sobre los recursos energéticos mundiales. Su reputación y valor, desde la primera edición en 1933, descansan en dos factores principales ...

In addition, part of ECLAC's working agenda focused on preparing for the upcoming Regional Energy Transition Dialogues for Latin America and the Caribbean, to be held in coordination with Guatemala's Ministry of Energy and Mines from November 26 to 29, 2024, in Guatemala City.

This, the 22nd edition of the World Energy Council's Survey of Energy Resources (SER), is the latest in a long series of reviews of the status of the world's major energy resources. It covers not only the fossil fuels but also the major types of traditional and novel sources of energy.

Energy production - mainly the burning of fossil fuels - accounts for around three-quarters of global greenhouse gas emissions. Not only is energy production the largest driver of climate change, but the burning of fossil fuels and ...

Energy and modern life are closely intertwined; energy powers homes, hospitals, schools and more. When people have access to clean, affordable and reliable energy, they have greater opportunities for healthy and prosperous lives. But the ...

In 2020, the World Energy Leaders' Summit took place digitally on Thursday 8th October 12.00 - 14.00 (UTC+1). The dramatic impact of the COVID-19 crisis across all sectors, regions and society resulted in the largest capital reallocation ever seen.

CO₂ emissions are dominated by the burning of fossil fuels for energy production, and industrial production of materials such as cement. What is the contribution of each fuel source to the country's CO₂ emissions? This interactive chart shows the breakdown of annual CO₂ emissions by source: either coal, oil, gas, cement production or gas flaring. This breakdown is strongly ...
